This supplement to Paige's "History of Cambridge, Mass." contains citations to the people and places in both the historical and genealogical portions, as well as extensive topical citations. The supplement contains additional genealogical data gleaned from the Vital Records of Cambridge and from various church records, town histories, genealogies, and Bibles which greatly extended the genealogies. G0012HB - \$63.50 Wide-ranging compilation that reflects multiple interactions of significant topics from that era. The middle chapters of this book are given over to Wilkes County genealogy and biography, with chapters on the buyers and sellers of lots and the early settlers of the county. The work as a whole is crowded with references to ministers, officials, teachers, and soldiers, so much so that an index of more than 2,000 entries was created by Mrs. Hays to encompass them. Contains opinions and comment on other currently published newspapers and magazines, a selection of poetry, essays, historical events, voyages, news (foreign and domestic) including news of North America, a register of the month's new publications, a calendar of forthcoming trade fairs, a summary of monthly events, vital statistics (births, deaths, marriages), preferments,

commodity prices. Samuel Johnson contributed parliamentary reports as "Debates of the Senate of Magna Lilliputia." A priced and annotated annual record of international book auctions. Based on nearly five decades of research, this magisterial work is a biographical register and analysis of the people who most directly influenced the course of the Civil War, its high commanders. Numbering 3,396, they include the presidents and their cabinet members, state governors, general officers of the Union and Confederate armies (regular, provisional, volunteers, and militia), and admirals and commodores of the two navies. *Civil War High Commands* will become a cornerstone reference work on these personalities and the meaning of their commands, and on the Civil War itself. Errors of fact and interpretation concerning the high commanders are legion in the Civil War literature, in reference works as well as in narrative accounts. The present work brings together for the first time in one volume the most reliable facts available, drawn from more than 1,000 sources and including the most recent research. The biographical entries include complete names, birthplaces, important relatives, education, vocations, publications, military grades, wartime assignments, wounds, captures, exchanges, paroles, honors, and place of death and interment. In addition to its main component, the biographies, the volume also includes a number of essays, tables, and synopses designed to clarify previously obscure matters such as the definition of grades and ranks; the difference between commissions in regular, provisional, volunteer, and militia services; the chronology of military laws and executive decisions before, during, and

after the war; and the geographical breakdown of command structures. The book is illustrated with 84 new diagrams of all the insignias used throughout the war and with 129 portraits of the most important high commanders.

Nineteenth-Century Choral Music is a collection of essays studying choral music making as a cultural phenomenon, one that had an impact on multiple parts of society. Rather than merely offering a collection of raw descriptions of works, the contributors focus their discussions on what these pieces reveal about their composers as craftsmen/women. Major works as well as other equally rich parts of the repertoire are discussed, including smaller choral works and contributions by composers such as Fanny Mendelssohn, Amy Beach, Charles Stanford, Racing Line is the story of big-bike racing in Britain during the 1960s - when the British racing single reached its peak; when exciting racing unfolded at circuits across the land every summer; and when Britain took its last great generation of riding talent and engineering skill to the world. Collection of those articles concerning China and the Chinese, assembled at the behest of Charles W. Wason, with t.p. modified and table of contents supplied in typescript. The Planters of Colonial Virginia is a research on the colonial Virginia political and economic experience of the tobacco planter culture. The book covers a time from the founding of Jamestown to the disbursement of the settlers to various other places.
