The music of Shostakovich has been at the centre of interest of both the general public and dedicated scholars throughout the last twenty years. Most of the relevant literature, however, is of a biographical nature. The focus of this book is musical irony. It offers new methodologies for the semiotic analysis of music, and inspects the ironical messages in Shostakovich's music independently of political and biographical bias. Its approach to music is interdisciplinary, comparing musical devices with the artistic principles and literary analyses of satire, irony, parody and the grotesque. Each one of these is firstly inspected and defined as a separate subject, independent of music. The results of these inspections are subsequently applied to music, firstly music in general and then more specifically to the music of Shostakovich. The composers cultural and historical milieux are taken into account and, where relevant, inspected and analysed separately before their application to the music. Intelligent Control techniques are becoming important tools in both academia and industry. Methodologies developed in the field of soft-computing, such as neural networks, fuzzy systems and evolutionary computation, can lead to accommodation of more complex processes, improved performance and considerable time savings and cost reductions. Intelligent Control Systems using Computational Intelligence Techniques details the application of these tools to the field of control systems. Each chapter gives an overview of current approaches in the topic covered, with a set of the most important references in the field, and then details the author's approach, examining both the theory and practical applications. At last, here is a book that reveals what the public really wants to know about this legendary investor: how he determines where he puts his money. From a team with privileged insight, Mary Buffett, a savvy CEO and Warren Buffett's former daughter-in-law, and David Clarke, a successful portfolio analyst, comes BUFFETTOLOGY, the most detailed explanation ever of the billionaire's unique investment techniques. Using Warren Buffett's system to access a company's potential economic excellence and the right price to pay for its stock, BUFFETTOLOGY demonstrates the actual mathematical models and equations, revolving around three variables: the yearly per share earnings figure, its predictability, and the market price of security. With BUFFETTOLOGY, individual investors will come to truly understand, and emulate, Warren Buffett's masterful insight, and see that investment is most intelligent when it is most businesslike. Since the first volume on Biophysical Techniques in Photosynthesis Research, published in 1996, new experimental techniques and methods have been devised at a rapid pace. The present book is a sequel which complements the publication of the first volume by providing a comprehensive overview of the most important new techniques developed over the past ten years, especially those that are relevant for research on the mechanism and fundamental aspects of photosynthesis.

In recent years, advanced molecular techniques in diagnostic microbiology have been revolutionizing the practice of clinical microbiology in the hospital setting. Molecular diagnostic testing in general and nucleic acid-based amplification methods in particular have been heralded as diagnostic tools for the new millennium. This third edition covers not only the most recent updates and advances, but details newly invented omic techniques, such as next generation sequencing. It is divided into two distinct volumes, with Volume 1 describing the techniques, and Volume 2 addressing their applications in the field. In addition, both volumes focus more so on the clinical relevance of the test results generated by these techniques than previous editions. This second edition has been extensively revised to bring clinicians fully up to date with the latest technologies and advances in the field of assisted reproductive techniques (ART). Each section is dedicated to a sub specialty, from polycystic ovary syndrome, ART procedures, and laboratory issues, to implantation, cryopreservation, endoscopy, ultrasound and more. A section entitled 'contemporary thoughts' examines the improvement of IVF outcome, ART and older women, and HIV and ART, and another discusses third party reproduction. "Huhtamo and Parikka, from the first and second generations of media archaeology, have brought together the best writings from almost all of the best authors in the field. Whether we speak of cultural materialism, media art history, new historicism or software studies, the essays compiled here provide not only an anthology of innovative historical case studies, but also a methodology for the future of media studies as material and historical analysis. Media Archaeology is destined to be a key handbook for a new generation of media scholars." —Sean Cubitt, author of *The Cinema Effect* "Taken together, this excellent collection of essays by a wide range of scholars and practitioners demonstrates how the emerging field of media archaeology not only excavates the ways in which newer media work to remediate earlier forms and practices but also sketches out how older media help to premeditate new ones." —Richard Grusin, author of *Premediation: Affect and Mediality after 9/11* "In Media Archaeology, a constellation of interdisciplinary writers explore society's relationship with the technological imaginary through history, with fascinating essays on influencing machines, Freud as media theorist, interactive games from the 19th century to the present day, just to name a few. As an artist, my mind is set on fire by discussions of the marvelous inventions that never made it to the mainstream, such as optophonic poetry, Christopher Strachey's 1952 'Love letter generator' for the Manchester Mark II computer, and the 'Baby talkie.'" —Zoe Beloff, artist and editor of *The Coney Island Amateur Psychoanalytic Society and Its Circle* "A long-awaited synthesis addressing media archaeology in all of its epistemological complexity. With wide-ranging intellectual breath and creative insight, Huhtamo and Parikka bring together an eminent array of international scholars in film and media studies, literary criticism, and history of science in the spirit of making the discourse of the humanities legible to artist-intellectuals. This foundational volume enables a sophisticated understanding of reproducible audiovisual media culture as apparatus, historical form, and avant-garde space of play." —Peter J. Bloom, author of *French Colonial Documentary: Mythologies of Humanitarianism* "An essential read for everyone interested in the histories of media and art." —Oliver Grau, author of *MediaArtHistories* "Media archaeology is a wonderful new shadow field. If you are willing to step outside the glow of new media, this book's approaches can shift how you experience the objects and experiences that fill the new everyday of contemporary life. No one captures the beauty of studying new media in the shadow of older media implements and practices better than Erkki Huhtamo, the Finnish writer, curator, and scholar of media technology and design famous for his creative work as a preservationist and an interpreter of pre-cinematic technologies of visual display. He has teamed up here with Jussi Parikka, the Finnish scholar who has brought us an insect theory of media, to give us this long-awaited collection of essays in media archaeology. The surprise of the book is that the essays collectively bring forward a range of approaches to considering archaeological practice, giving us new ways to think about our embodied and subjective orientations to technologies and objects through the lens of the material remnants of practice, rather than offering a narrow definition of the field. The collection moves between computational machines and influencing machines, preservation and imagination, offering a range of ways to live the new everyday of media experience through the imaginary of archaeology." —Lisa Cartwright, co-author of *Practices of Looking: An Introduction to Visual Culture* "Where McLuhan's Understanding Media ends, Media Archaeology actually begins. Refusing the often futile search for the eternal laws of media, Media Archaeology does something more difficult and rare. It literally brings the history of media alive by drawing into presence the enigmatic, heterogeneous, unruly past of the media—its artifacts, machines, imaginaries, tactics, and games. What results is a fabulous cabinet of (media) memories: the imaginary moving with kinetic frenzy, histories of what happens when media collide in the electronic space of the virtual, and stories about those strange interstitial spaces between analogue and digital." —Arthur Kroker, author of *The Will to Technology and the Culture of Nihilism* "Rupturing the continuities and established values of traditional media history, this exciting and thought-provoking collection makes a significant contribution to our understanding of media culture, and demonstrates that the presence of the past in present-day media is central to the recognition and re-cognition that media archaeology promotes." —John Fullerton, editor of *Screen Culture: History and Textuality* "Here, at last, is a collection of essays that are a critical step to comprehending the history of our impulse to see ourselves in the machines we have made. This could be the beginning of 'Archaeology of Intention.'" —Bernie Lubell, artist "Huhtamo and Parikka's expertly curated collection is a kaleidoscopic tour of media archaeology, giving us forceful evidence of that unruly domain's vitality while preserving its wonderful unpredictability. With this essential volume, countless new paths have been opened up for media and cultural historians." —Charles R. Acland, author of *Screen Traffic* "This brilliant collection of essays provides much needed material and historical grounding for our understanding of new media. At the same time, it animates that ground by recognizing the integral roles that imagination, embodiment, and even productive

disturbance play in media historiography. Yet these essays constitute more than a collection of historical case studies; together, they transform the book's subject into its overall method. Media Archaeology performs media archaeology. Huhtamo and Parikka excavate the intellectual traditions and map the epistemological terrain of media archaeology itself, demonstrating that the field is ripe with possibilities not only for further historical examination, but also for imagining exciting new scholarly and creative futures." —Shannon Mattern, *The New School* A certified financial planner helps investors deal with the contradictory desires of acquiring great wealth quickly while simultaneously fearing the loss of capital. Collins points to smart strategies for achieving balance between high-growth technology stocks and consistent long-term value. Research on cholera has contributed both to knowledge of the epidemic in particular, and to a broader understanding of the fundamental ways in which cells communicate with each other. This volume presents current knowledge in historical perspective to enable the practitioner to treat cholera in a more effective manner, and to provide a comprehensive review for the researcher. About ten years after the first edition comes this second edition of Monte Carlo Techniques in Radiation Therapy: Introduction, Source Modelling, and Patient Dose Calculations, thoroughly updated and extended with the latest topics, edited by Frank Verhaegen and Joao Seco. This book aims to provide a brief introduction to the history and basics of Monte Carlo simulation, but again has a strong focus on applications in radiotherapy. Since the first edition, Monte Carlo simulation has found many new applications, which are included in detail. The applications sections in this book cover the following: Modelling transport of photons, electrons, protons, and ions Modelling radiation sources for external beam radiotherapy Modelling radiation sources for brachytherapy Design of radiation sources Modelling dynamic beam delivery Patient dose calculations in external beam radiotherapy Patient dose calculations in brachytherapy Use of artificial intelligence in Monte Carlo simulations This book is intended for both students and professionals, both novice and experienced, in medical radiotherapy physics. It combines overviews of development, methods, and references to facilitate Monte Carlo studies.

The Mortgage (Rights) Scotland Act 2001 alters the law relating to property repossessions in Scotland. It gives the courts a discretionary power to refuse repossession orders where a secured lender wishes to recover property. This book gives an account of this legislation and its likely impact This book offers a thorough revision and update to the first landmark book that presented a standardized approach to focused point-of-care ultrasound exams of the abdomen, thorax, musculoskeletal and eye in veterinary practice. Now incorporating new applications for focused ultrasound exams and additional species, this Second Edition continues to be a state-of-the-art reference for using abbreviated ultrasound exams in clinical practice. A companion website features supplementary video clips of these point-of-care techniques depicting actual ultrasound exams for comparison and comprehension. New chapters in Point-of-Care Ultrasound Techniques for the Small Animal Practitioner, Second Edition cover ultrasound-guided nerve blocks, musculoskeletal, brain imaging, and applications of focused ultrasound techniques in cats, exotics and marine mammals—making it an essential purchase for veterinarians wanting to incorporate point-of-care ultrasound techniques into their veterinary practices. The second edition of Point-of-Care Ultrasound Techniques for the Small Animal Practitioner is an excellent resource for veterinary practitioners,

ranging from the general practitioner to nearly all clinical specialists, including internal medicine, oncology, cardiology, emergency and critical care, anesthesiology, ophthalmology, exotics, and zoo medicine specialists, and veterinary students. Written and edited by leading, internationally recognized clinicians and scientists in reproductive medicine and related fields, this unique text is a practical and comprehensive review of the clinical and scientific significance of unexplained male and female infertility and its management. The book is divided into thematic sections to ensure the most useful presentation of topics, opening with definitions and epidemiology of unexplained infertility, including discussion of the WHO's cutoff values for human semen characteristics and its ramifications. Sections covering male and female reproductive pathophysiology follow respectively, covering biological, genetic and environmental causative factors, with a subsequent section on evaluative techniques for male and female patients. Expectant, medical and surgical treatment strategies comprise the fifth section of the book, where active interventions and outcomes of each treatment modality are carefully considered. The final section discusses assisted reproductive techniques to manage unexplained infertility, such as intrauterine insemination and in vitro fertilization, as well as future perspectives. Thoughtful and enlightening, *Unexplained Infertility: Pathophysiology, Evaluation and Treatment* will be an invaluable resource for all clinicians and scientists working in the fields of reproductive medicine and infertility. In his influential work, *Strategy Safari*, Henry Mintzberg and his colleagues presented ten schools of strategic thought. In this impressive book, Dany Jacobs demonstrates that the real world of strategic management is much wider and richer. In *Mapping Strategic Diversity*, Jacobs distinguishes between 'cockpit theories' of strategy, which bring rational analysis to the forefront, and process-oriented social science approaches, which bring in a wider array of influences to the theory and practice of business planning. Presenting 22 different approaches to strategy making, this book: provides a comprehensive overview of the field guides the reader in developing theoretical and practical skills helps develop both high and low level strategic thinking This textbook is a useful analysis for practising managers, but really comes into its own as an advanced introduction to the field of strategic management; having read this book, students are fully armed to enter the strategy jungle!
